PROFESSIONAL SUMMARY

A food systems researcher working toward a more sustainable, resilient food future. Expertised in life cycle assessment, scenario modelling, and agricultural policy, with a background in biotechnology. Equally suited to industry R&D, academic research or consultancy roles, bringing cross disciplinary analysis to food-system challenges. Passionate about how science and policy come together to build food systems that work for people and the planet.

WORK EXPERIENCE

February 2026 - July 2026

Research Assistant | KTH Food | Stockholm, Sweden.

- Contributed to a national strategic framework positioning oats as a priority crop for Swedish food systems resilience
- Collected and synthesised national data on oat production, weather (temperature & precipitation) exports, and yield variability
- Conducted life cycle assessment (LCA) of oat production systems across the supply chain
- Built two scenario models (Swedish oat production & oat protein-processing) projecting oat's role under different agricultural policy and climate futures
- Ran a dedicated data-collection study mapping Sweden's oat-processing value chain.

December 2023 – June 2025

Research Trainee (Part-time) | Lund University | Malmö, Sweden

- Performed cell culture techniques, maintaining CACO-2 cell lines and running assays
- Conducted Western blotting and immunofluorescence assays to analyze protein expression in cancer cells
- Used Chemi-doc, spectrophotometers, PCR, and advanced imaging systems
- Applied wound healing assays, immunohistochemistry (IHC), and RT-PCR to study cancer metastasis

Oct 2022 – Jul 2023

Assistant in biomedical laboratory | Shivashakti Clinical Laboratory | Trivandrum, India

- Conducted a wide range of clinical tests, ensuring accurate and reliable results
- Collected and processed patient samples for various clinical tests
- Separated blood plasma from cells for plasma and hormone testing
- Managed laboratory supplies and reagent inventory to prevent shortages

EDUCATION

August 2023 - June 2025

Master's in Food Studies | Swedish University of Agricultural Sciences | Alnarp, Sweden

November 2020 - September 2022

Master's in Biotechnology | Kerala University | Trivandrum, India

June 2017 - June 2020

Bachelor's in Botany and Biotechnology | Mar Ivanios College | Trivandrum, India

PUBLICATIONS

Beyond boundaries: exploring the role of extracellular vesicles in organ-specific metastasis in solid tumors | Frontiers in Immunology, 2025 | <https://doi.org/10.3389/fimmu.2025.1593834>

Evolution of Foodscapes | Master's Thesis | SLU Epsilon, 2025 | <https://stud.epsilon.slu.se/21420/>

PROJECTS

Eat Local Lund | Lund Kommun | November 2024 - January 2025

A strategic proposal to strengthen local food consumption and sustainability in Lund Municipality, aligned with the EU Climate City Contract and UN SDGs.

Urban Farm 2024 | ISHS | May 2024

Awarded the ISHS Young Mind Award for a proposal to develop a sustainable prison farm in Trelleborg, Sweden integrating food production, rehabilitation, and circular economy principles.

CERTIFICATIONS

Research Data Management and Sharing | University of Edinburgh | 2025

The New Nordic Diet: from Gastronomy to Health | University of Copenhagen | 2025

Dairy Production and Management | Penn State University | 2023

SKILLS

Food Systems & Sustainability: Food System Analysis, Food Policy, Food Sustainability, SDGs, LCA Analysis, Scenario Modelling, Systems Thinking

Research & Technical: Molecular Biology Techniques, Cell Culture, Western Blotting, Immunofluorescence (IF), Immunohistochemistry (IHC), RT-PCR, Microbiological Analysis, Instrumental Analysis

Research & Communication: Research Design, Data Analysis, Scientific Writing

Tools & Project Skills: Microsoft Office, Canva, Project Management, Interdisciplinary Collaboration
